

Our Vision

Our vision is to be a vocational school that takes into account the changing and evolving conditions of the healthcare sector, with an educational culture focused on knowledge, sharing, and technology, recognized by public and private healthcare institutions, whose graduates are particularly preferred, and trains human resources capable of applying the requirements of the profession at the highest level.

Our Mission

Our mission is to train qualified personnel for the healthcare sector who will quickly adapt to working life by providing them with all the theoretical and practical training required by the profession, who are inquisitive, open to development, constantly update themselves in line with the needs of the sector, have a sense of responsibility, are reliable, embrace ethical principles, and prioritize human health.
